

Quick Start Guide :

Adding the "Operations" tab to the main **PanelPro** menu-bar

This step-by-step guide should only need to be used once, after which, the "Operations" tab will display in the main menu-bar of the **PanelPro** start-up window. This will allow the user to more quickly access the 6 main functions of "Operations".

Step-by-step "How-To":

1. Open **PanelPro**.
2. Set Active Profile (the profile for which you intend to use "Operations").
 - a. Click "OK".
3. Select "Tools"--->"Operations"--->"Settings" from the menu drop-down.
4. In the **Settings** window, the "Options" section, click the "Add Operations Menu to Main Menu" box.
 - a. Click "Save".
5. Close the **Settings** window.
6. Quit **PanelPro**.
7. ReOpen **PanelPro**.

Upon completion of this task, the "Operations" menu choice should be displayed between "Panels" and "Debug" on the main menu-bar.

Note: All these quick-start guides are intended for use with OpsPro, a stand-alone app accessed from within PanelPro. No other PanelPro functions need be used if so preferred.
